

Applied Building Construction

6-Month Certificate

Start with an introduction to basic tools and before you know it, you will be reading blueprints, building stairs and framing walls.

PROGRAM LEARNING OUTCOMES

- ▶ Interpret project plans and produce technical sketches and documents to support building construction and renovation projects.
- ▶ Select and use technologies to obtain, organize and communicate building construction and renovation information.
- ▶ Solve problems related to the implementation of building construction and renovation projects by using basic mathematics, building design and building science.
- ▶ Select, maintain and safely use hand tools, and portable and stationary power tools, when performing layout, cutting, fitting and assembly operations, and standard woodworking machinery.
- ▶ Complete building and renovation stages, from site layout and footings to the application of interior and exterior finishes, in accordance with blueprint specifications and conservation principles.
- ▶ Assist in the preparation of material estimations and quotes and complete all work in compliance with the rights and conditions of contractual obligations, provincial and/or national Building Codes, applicable laws, bylaws, standards and ethical practices in the construction, renovation and building fields.
- ▶ Communicate and collaborate with diverse clients, supervisors, coworkers and tradespersons to complete projects on time and to maintain effective working relationships.
